PURCHASING GOOGLE eBooks FROM REDBERRY BOOKS

(Either directly from your device or from any other computer)

1. On a **Nook Color** or on any computer, use a web browser (e.g., Safari, Chrome, Firefox or Internet Explorer) to go to the **Redberry Books** website (www.redberrybooks.com) and log in to your account.
2. Choose your book either by using the general search box or by selecting a book directly and then selecting the “**Google eBook**” from the related editions; or by using “**Search Google eBooks**” in the right sidebar
3. Add the **Google eBook** to your cart and complete the purchase normally. Your **Google eBook** is now available to you in your Google account from any device (except Kindle).

READING YOUR GOOGLE eBooks (iPad, iPhone, Android)

1. On your desktop or laptop computer, log in to the **Redberry Books** website (www.redberrybooks.com) and click the “**Read my Google eBooks**” in the right sidebar. (You will need to be logged in to your Google account and will be reminded to do so if you are not.) All of your **Google eBooks** will appear and be available to you here whether they were purchased from **Redberry Books** or not.
2. Select the book that you want to read on your **Nook** and download the “**Adobe Digital Editions**” file to a location on your computer. I suggest creating a **Google eBooks** folder for this purpose.
3. Double-click the downloaded file. It will open in the **Adobe Digital Editions** program (see first time only instructions). The **Google eBook** will appear on your “purchased” bookshelf under “all items” [**Nook**] or in the “my files” section of the library [**Nook Color**].
4. Plug your **Nook** into your computer using the USB cable. **Adobe Digital Editions** will automatically detect your **Nook** and will appear under the bookshelves list.
5. Select the **Google eBook** that you want to read on your **Nook** and drag the icon (within **Adobe Digital Editions**) to the **Nook** icon.
6. **Read!**
